Painting and Finishing Military Figures (Expert Model Craft)

Rob Henden : Painting and Finishing Military Figures (Expert Model Craft) before purchasing it in order to gage whether or not it would be worth my time, and all praised Painting and Finishing Military Figures (Expert Model Craft):

0 of 0 people found the following review helpful. ThanksBy MikeEducational. Great job.6 of 7 people found the following review helpful. Nice. But, had hoped for more.By Thomas RoylancePros: Excellent large scale figure tutorial. Easy to follow instructions with several helpful tips (check out the extras section). I really liked the host - he was very personable and very talented. You could tell he enjoys what he does.Cons: DVD concentrated on a single scale (1/9) and a single subject(Fallschirmjger) and a single medium (acrylic). It would have been nice to see a greater variety of scale and technique.DVD will come in handy for my 1/16 Tamiya WWII German Elite Infantryman.

Rob Henden, internationally respected modeler, shows how to choose, assemble and paint military figures. In super close-up detail we learn the skills necessary to achieve the completely realistic results that led to the creation of his Gold Medal winning SS Fallschirmjager figure. This program takes us from research, kit choice and tools required through cleaning of castings, filling and finishing assembly to priming, brush and airbrush painting and eventually to appropriate base-work. He looks in detail at texturing, painting flesh-tones, facial features, clothing, weapons and equipment, wood grain, leather, dry brushing, metals and much much more. A highly detailed menu lists each topic for easy and immediate navigation whilst the DVD pause facility allows you to stop the action at any time to appreciate in close detail each step and the finished astonishing models. Main program approx. 56 minutes PLUS these great DVD Extras: Profile of Rob Henden Model panorama Correcting common mistakes List of products used or recommended Sources, reference and bibliographyTotal running time: approx. 100 minutes

For those wanting to get into figure modeling, this is a great way to start, as Robs instructions are clear and easily understood. (Chris Banyai-Riepl, Internet Modeler)
