Paper Toys

Francois Chetcuti : Paper Toys before purchasing it in order to gage whether or not it would be worth my time, and all praised Paper Toys:

0 of 0 people found the following review helpful. A fantastic way to make paper toysBy JanisA fantastic way to make paper toys. But the tin was just placed in the box with no padding. The tin was crushed and dented during shipment. %-(But the paper book and materials were fine and fun to make the toys.1 of 1 people found the following review helpful. Love this set- well crafted and the instructions are clearBy Maureen CoolingLove this set- well crafted and the

instructions are clear. The figures take a while to put together but are ingenious and fun. Makes a great present for tinker types!

This extraordinary construction kit contains eight different models to build yourself from a delightful car with driver to a pop-up monster or a plane with propeller. There are perforated construction sheets for each figure and additional material, including wooden sticks, rubber bands and beads, and an extensive manual with detailed step-by-step illustrations. Even non-experts will be able to build these models. The colourful results will delight not only children. The models have been lovingly created and include ingenious mechanisms: when you push the car, the driver and his luggage sway amusingly from side to side, caused by clever positioning of the rear axle. The doll moves gracefully at the slightest breath of wind, and the clown's facial expression changes when you turn the wooden stick. Presented in a classy metal box, this is the perfect gift for parents and children alike!

About the Author François Chetcuti is an illustrator and a papertoy artist.
