Pz.Kpfw. III family (Mini Topcolors)

Marek Jaszczolt, Slawomir Zajaczkowksi : Pz.Kpfw. III family (Mini Topcolors) before purchasing it in order to gage whether or not it would be worth my time, and all praised Pz.Kpfw. III family (Mini Topcolors):

What there was was good, but there was not enough. Overall, if you want a book on the Pz III get the Kagero Panzer III J/L/M. Most of this book was on the Stug III. There are better books on the Stug. if that is what you want. This book doesn't do justice to either vehicle. If you are doing a Pz III do a Pz III, If a Stug, than do a Stug.. Mini is the right word for this. The decal sheet is great though, covering the three major scales (1/72 1/48 1/35) and are for vehicles depicted in the book.0 of 0 people found the following review helpful. should have concentrated on Panzer III proper... ...By Simon Scheuershould have concentrated on Panzer III proper...particularly because this is a decal set that should cover the tank, not the assault gun.0 of 0 people found the following review helpful. A big decal sheet with 1:72, 1:48 and 1:35 individual and national markings for 8 Pz.Kpfw. III tanks and 8 Sturmgeschtz assault guns built on the chassis of the Pz.Kpfw. III. The decal sheet was printed by Cartograf. Each painting scheme is depicted on a beautifully drawn color profile and described in the 20 page guidebook with English and Polish text. "What makes this as a book for modellers though is that a large sheet of transfers are included, with the markings needed for all 16 subjects featured in the book, and they are done in 1/35, 1/48 and 1/72 all on the one sheet. So enough to attract any AFV modeller no matter what your preferred scale (or if you are like me, then all three!). The transfers are printed by Cartogrpah so you know they are of good quality. Among the vehicles featured in, just to give a guide, there are a Pz III Ausf J in North Africa, in a unit equipped with demolition vehicles; a Stug III Ausf G and a Pz III Ausf N at Kursk; a Stug III F/8 from the Herman Goring Div in Sicily in 1943; along with others on the Eastern Front, in Italy, France and Holland providing a good selection of the different theatres where these well used vehicles saw service. Overall this is of course a little book for Pz III fans in particular, and with such good quality artwork and transfers, it should attract a keen following." (Military Modeling.com)
