I was expecting that I could actually make the 12 bracelets with this craft kit but after receiving my kit and reading the book, I was shocked to discover that it only includes enough materials to make 3 "starter" bracelets. That part is not even true because you will need other items to even create the 3 starter bracelets. When buying a kit like this, one would expect the materials to be included. They don't even include a

beading needle and thread, which are the materials needed to complete the starter bracelets, as well as any other ones you want to try with your own materials. How much do a needle and thread really cost? Was it that hard to include them? Especially since they are necessary to complete every project in the book!!! And as far as the "free youtube tutorials", anyone with internet access can view a youtube tutorial so that is definitely no bonus! I only bought this because I thought that I would be able to make the bracelets in the book with the materials INCLUDED in the kit. I think that I will most likely have to return this. 0 of 0 people found the following review helpful. I am not happy with the kit. By Emily Celeski It said kit, so I assumed it would come with everything you would need to make it. However, you have to supply your own needle and clear nail polish. Also, they give you cord in three different colors that would only wrap once around an adults wrist. I am guessing they measured for children. I am not happy with the kit, but I do enjoy the youtube videos that come with it. If I hadn't already opened up the box and tried to make one (looks like crap), I would return this kit. You are better off making tie friendship bracelets. 29 of 29 people found the following review helpful. I also wish I had read the reviews before purchasing ... By Carol Hain I also wish I had read the reviews before purchasing this. It's very cheap, but you get what you pay for and in this case you're not paying for much. To be clear, the bracelets shown on the cover photo can not be made with the beads sent with the 'kit'. The beads are tiny and cheap and you aren't given the materials to thread the beads on to the cord. Oh well, there's a book at least!
