This book is a great read and if you like a good stamp story ...By TriciaThis is a very good book and a must-have for any Philatelic library that already contains Max J. Johl. Consider that Johl wrote about the twenties and thirties in the wwii era in the later editions. The approach here is not to duplicate Johl but rather to make it current, he says so in the preface. This book by design expands into the deep historical background including the politics thereof Johl altogether ignores. Thankfully he does not take either side and

tells a good story for each series without supporting the Hoover vs. FDR world views.

Since its publication in 1997, Griffith's United States Stamps 1922-26 has become the definitive reference work on these issues. Not only does it cover the stamps and their production, but the political background that led to the stamps' issue. Illustrated with 135 black-and-white photographs in addition to the stamp illustrations. A continuing volume, United States Stamps 1927-32, published by Linn's in 2001, completes the study of all the stamps issued during the administrations of presidents Harding, Coolidge, and Hoover. Both volumes are frequently cited by scholars, expertizers and leading auction firms, and are a must for any serious philatelic library.

Superb in-depth examination of the Fourth Bureau Issues and the commemorative issues of the period. Well illustrated. --James Lee, Philatlic Literature Catalog.
