David Feartherston's Woodys By Jonathan Bolton This is a great book for anyone who loves cars made with wood. It covers everything from the earliest Pre-World War One cars to Ninties vehicles with fake trim; from beautifully restored originals to hot rods and even custom-built one-offs; and not just wagons, but sedans and convertibles, too. If you want to know how to build or restore a Woody, this is not the book to by (although it's great for inspiration), but if you just want to enjoy looking at these beautiful cars, and finding out more about them, it's a definat must-buy.
