And Jacobs has assembled photographs of some fairly uncommon items from his pool of experienced contributors. But that's where the kudos end. It is mostly all BW with just a few color. The organization makes it almost impossible to identify an item that does not have a picture.

He lists two different prices for the same item on different pages. His coverage of the homefront area is poor. He wastes several pages on listing gum cards while completely failing in the areas like anti-axis where covers, cinderellas and postcards are just about all that is listed missing ceramics, toys etc in that subcategory. He has a slug of jewelry photos that someone obviously spent a great deal of time shooting but they are all in BW completely subduing that contribution. And his prices are plain and simply not credible especially when compared to his V For Victory book

which has many of the same items but radically different prices without explanation. Overall I'd say buy it just for the pics but throw out the price guide part. Its a woefully error ridden text. An obvious rush job. I give it two stars for being the first.3 of 4 people found the following review helpful.
